Two Tenure-track positions in Creative Technologies and Design

The ATLAS Institute at the University of Colorado Boulder seeks two curious, unconventional, polymath tenure-track faculty members in creative technologies and design. They will establish and lead research groups that explore transdisciplinary fields and paradigms, produce internationally recognized work, and develop collaborative relationships in academia as well as industry and the community. Applicants should have a PhD or equivalent experience, be able to publish in peer-reviewed venues, and obtain funding to support their work. They should value innovative and effective teaching for students from different cultural and intellectual backgrounds.

ATLAS academic programs in the College of Engineering and Applied Science include a Technology, Arts and Media (TAM) undergraduate program, and graduate programs (MS and PhD) in Technology, Media and Society.

We are building a faculty with theoretical and methodological versatility with the goal of designing experiences and technologies to improve life. ATLAS is a growing Institute, looking for people who will help us foster a culture and community of wild innovation. The most innovative research and teaching will come from a faculty varied in life experiences and academic disciplines, so we seek applicants who will promote diversity in all ATLAS programs.

ATLAS Institute faculty members creatively design, engineer and apply technologies.

Promising applicants will combine engineering virtuosity with a commitment to creative and thoughtful design. We will consider applicants who do so through a variety of approaches, including, but not limited to:

- Designing new technologies for creative play and learning for families and communities
- Using participatory design to empower communities to create resources for local change
- Inventing technologies (games, music, apps, wearables, etc.) that transcend physical and virtual spaces
- Developing technologies to effect societal change

The opening is targeted at the level of Assistant Professor, but experienced candidates with outstanding credentials may be considered for Associate or Full Professor. Review of applications will begin on November 1, 2015.

Applications will be accepted until the positions are filled.

The University of Colorado is an Equal Opportunity Employer committed to building a diverse workforce. We encourage applications from women, racial and ethnic minorities, individuals with disabilities, and veterans. Alternative formats of this ad can be provided upon request for individuals with disabilities by contacting the ADA Coordinator at hr-ada@colorado.edu. The University of Colorado Boulder is committed to providing a safe and productive learning and living community. To achieve that goal, we conduct background investigations for all final applicants being considered for employment. Background investigations include reference checks, a criminal history record check, and when appropriate, a financial and/or motor vehicle history.
